

NAGARAJ RAVI

SENIOR SOFTWARE ENGINEER

Chennai, India | +91-80988-27964 | shakthipav@gmail.com

PROFILE SUMMARY

Proven 9+ years of experience in developing Full-Stack Web and Hybrid Mobile Applications, with hands-on expertise in AWS cloud services. Continuously learning emerging technologies including ML/AI/NLP, AI Agent, MCP, Web3 JavaScript frameworks, and Cybersecurity.

EXPERIENCE

Senior Computer System Analyst

Information e-Government Authority, Bahrain
| 2024 – Mar 2026

- Designed and developed a scalable web application for the Urban Planning Development Authority using Node.js, PostgreSQL, React.js, GraphQL, AWS, and Camunda
- Led frontend development, migrating React 16.8 to React 19 with Vite Typescript and modernizing the codebase for improved maintainability
- Improved application performance by ~30–40% through lazy loading, code optimization, and reusable component architecture
- Refactored legacy codebase, removed unused code, and standardized libraries to enhance stability and development efficiency
- Identified and fixed critical backend vulnerabilities, including SQL Injection, achieving 0 known security issues
- Designed and managed AWS CI/CD and serverless architecture (Lambda, API Gateway, CloudFront), enabling automated deployments and scalable performance
- Implemented event-driven microservices using SQS/SNS, secure authentication with Cognito, and deployed Camunda on EC2 for workflow orchestration
- Developed proof-of-concepts (POCs) using Figma and Google AI Studio to prototype UI/UX

Technical Lead

Agira Technologies | Mar 2019 - Dec 2023

- Led a development pod and delivered multiple applications including Sahins, ProRank Job Portal, and SledgeHealth Medical Application
- Contributed to development of InterMX within a collaborative multi-team environment
- Led client interactions for requirement gathering and conducted product demonstrations for Sahins, SledgeHealth, and InterMX, ensuring alignment with business needs
- Designed and developed full-stack applications using Angular 7+, Node.js, Python Flask, Express.js, and MongoDB
- Built an AI-powered resume parser using Python, Flask, and spaCy to extract structured candidate data from resumes and automate job portal screening.

- Managed CI/CD pipelines using Jenkins and deployed applications on AWS EC2, ensuring reliable and automated releases
 - Managed pod-level responsibilities including task allocation, code reviews, and delivery timelines
 - Developed the Figma for demonstrate the POC to the client.
-

Software Developer

Benseron Information Technologies | Mar Jan 2017 – Feb 2019

- Contributed to the development of POS and back-office applications including Linga BackOffice POS and Zenpepper Mobile Application
 - Designed and developed RESTful APIs using Go, MongoDB, and Redis for transaction processing, data synchronization, and POS calculations
 - Developed hybrid mobile applications using Ionic 3 and Angular, ensuring seamless integration with backend services.
-

EDUCATION

Bachelor of Engineering [Computer Science]

Anna University, 2016

SKILLS

Frontend

Angular (6+), React.js, TypeScript, JavaScript, HTML5, CSS3, SASS, Redux, Saga Zustand, Material UI, Bootstrap

Backend

Node.js, Go, PHP, Python (Flask, spacy), Express JS, Apollo GraphQL

Mobile / Hybrid

Ionic v3+, Flutter (Basics)

Databases / Caching

MySQL, MongoDB, PostgreSQL, Redis

AI Tools

GitHub Copilot, Google AI Studio, LangChain, CrewAI, Model Context Protocol (MCP), Claude

CI/CD

AWS CodePipeline, Code Build, Code commit, GitHub, Docker, Jenkins, Jira

Cloud & Deployment

AWS, Digital Ocean, Godaddy, Azure (Fundamental)

UX / WireFrame / POC

Figma, Google Ai Studio, Stich AI
